CASTING BLAST FURNACE IRON. [1961] [4]p. [DSIR
LLU] M. 2342.
Order from LC or SLA mi\$1.80, ph\$1.80 61-15478

Trans. of Liteynoye Proizvodstvo (USSR) 1959, no. 12,
p. 3-4.

In spite of appreciable differences in silicon content and of a high proportion of phosphorus, the mechanical properties of the iron of blast furnace melts treated with magnesium exceed by a factor of 3 or 4 the mechanical properties of the original iron, also the properties of sulphur and inoculated cupola cast irons (GOST 1412-54) and in many cases approach the mechanical properties of magnesium cupola cast iron (GOST 7293-54). Industrial experience has demonstrated the advantages of magnesium-treated iron from the blast furnace melt for casting machine components.
